- Rapid Remote Support Maximizes User Productivity
- Maximize Technology Investment through Increased Productivity and Efficiency
- Detailed Performance Reports, Asset Inventory Reports, and System Status Reports

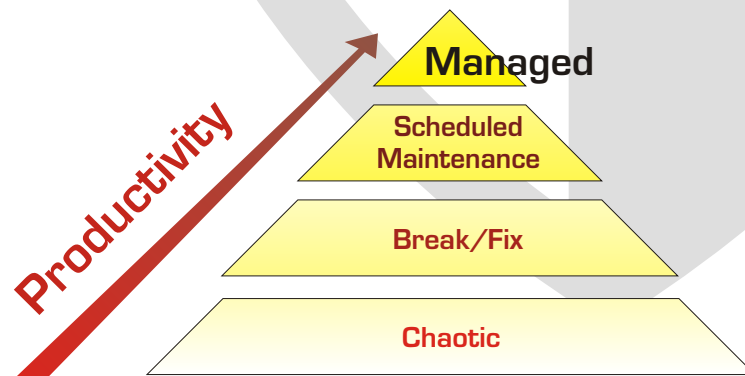

The Value of Brainforce's Managed Services

Information Technology (IT) has become a critical component of your business operations. Your business success depends on your IT infrastructure. Our Managed IT Services provide you the proactive support that not only keeps your network running effectively and efficiently but it helps you to reach your business goals.

While you focus on your business, Brainforce provides you with a professional and certified IT department for less than it would cost you to manage your IT services in house. We give you access to a powerful suite of tools that have normally only been available at the largest companies. Brainforce will design and effectively manage your day-to-day IT needs while we provide strategic guidance to make sure you get the most from your IT investments.

Brainforce Allows You to Reach the Peak of Productivity

The traditional model of IT support, the break/fix model, only goes into motion when a user is already impacted. This delay has cost you time and money. Managed support proactively monitors your network to alert Brainforce Computer Solutions whenever an issue is developing. With rapid remote support we can resolve these problems before they affect your business. We eliminate the questions and uncertainty. Know that your computers are safe, secure, and productive.

BRAINFORCE
COMPUTER SOLUTIONS

Your Needs as a Business

The complexity of your desktops, networks, and servers combined with an ever more mobile workforce have made supporting your IT resources extremely challenging. With so many patches, antivirus updates, spyware, inventory control, software deployment - your time is consumed by a myriad of issues. You are left with minimal time to actually run your business. Users are demanding more and your business is demanding better value.

The Brainforce Solution

The Brainforce Solution provides support, management, and strategic guidance with all of your IT resources. Brainforce Computer Solutions has the ability to access your complete network environment through a fully secure connection where we can monitor each resource from moment to moment. We watch what's going on so you don't need to. With our powerful management software you are now able to audit PCs, control patch management and antivirus updates, monitor system performance, and so much more. Brainforce will give you the control, service, and support you've always needed and wanted.
